MAIN FEATURES

FCB-EX Series

Sony's new FCB-EX series of color block cameras represent an evolution in security dome, police vehicle and traffic monitoring applications. These high-sensitivity FCB-EX color block cameras are equipped with an integrated lens and incorporate such new and unique surveillance features such as: **Enhanced Spherical Privacy Zone Masking Function** for use with a pan/tilt system and Sony's **SMART Lens Control Technology**. In addition, these FCB-EX cameras also incorporate high-performance Digital Signal Processing (DSP) that provides for enhanced picture quality and operability compared to conventional block cameras.

The FCB-EX980S/980SP and FCB-EX980/EX980P color block cameras are equipped with an incredibly high 26x zoom lens with a wide/telephoto horizontal field of view, ideally suited for use in security domes and traffic monitoring applications. The FCB-EX980S/EX980SP cameras combine a 1/4 type Super HAD™ CCD with Sony's new powerful 26x zoom "SMART" lens with a high telephoto zoom capability and image stabilizer function, allowing users to zoom in on small or distant objects with exceptional clarity and stability. The FCB-EX980/EX980P cameras combine a high-sensitivity 1/4 type EXview HAD™ CCD and Sony's new powerful 26x zoom "SMART" lens with a wide horizontal field of view.

The FCB-EX480C/EX480CP and FCB-EX48C/EX48CP color block cameras are equipped with an 18x zoom lens and incorporate a high-sensitivity 1/4 type EXview HAD® CCD allowing images to be captured a minimum illumination of 0.7 lux.

In addition, all of these FCB-EX cameras are equipped with a variety of convenient functions such as E-Flip, Alarm, Picture Freeze and Auto ICR¹ which have been inherited from earlier FCB-EX Series cameras. Moreover, all of these FCB-EX cameras use lead-free solder and halogen-free printed circuit boards, making these cameras environmentally friendly.

Combining superb picture quality and a variety of unique and convenient features, these new FCB-EX cameras are the perfect match, both indoor or outdoor, for demanding security and monitoring applications.

- 26x Optical Zoom Capability - FCB-EX980S/EX980SP and FCB-EX980/EX980P
- 18x Optical Zoom Capability - FCB-EX480C/EX480CP and FCB-EX48C/EX48CP
- Enhanced Spherical Privacy Zone Masking Function (max. 24 masking blocks)
- SMART Lens Control (Sony Modular Automatic Lens Reset Technology)
- Electronic-Flip (E-Flip) Function
- Alarm Function
- Auto ICR (IR Cut- filter Removal) Mode^{*2}
- Picture Freeze Function
- Image Stabilizer^{*3}
- High-Performance Digital Signal Processing (DSP)
- High-Speed Serial Interface (max. 38.4 Kb/s) with TTL Signal-Level Control (VISCA™ protocol)
- Equipped with Key Switch Connector (CN601) for Camera Control with External Equipment
- Various Customizable Settings
- Internal/External Sync
- Low Power Consumption (1.6 W with motors inactive)
- EEPROM Backup System without Battery
- 16-Bytes of Free Memory is Available for Recording Data such as Product Serial Numbers and Camera/System ID Numbers
- Lead-free Solder and Halogen-free Printed-circuit-boards

FEATURE DESCRIPTIONS

26x Zoom Capability with Wide/Telephoto Horizontal Field of View

(FCB-EX980S/EX980SP, FCB-EX980/EX980P)

These cameras incorporate a 26x optical zoom lens, allowing for a zoom capability of up to 312x when used in combination with its 12x digital zoom. Users can zoom in on small or distant objects with exceptional clarity.

The FCB-EX980S/EX980SP cameras feature a 42° wide field of view that provides the HIGHEST telephoto zoom capability (1.6°) available in the Sony FCB family. The zoom range is “tele-shifted” toward the telephoto end. The FCB-EX980/EX980P cameras feature a WIDE field of view of 54° and a 2.2° telephoto capability.

Enhanced Spherical Privacy Zone Masking

See Fig. 1

A newly developed Enhanced Spherical Privacy Zone Masking feature allows unwanted or prohibited areas within an image to be masked precisely and appropriately. This technology allows masking areas to be interlocked with Pan/Tilt/Zoom movements regardless of the camera angle. What is unique about this feature as compared to conventional masking is that the masked areas remain covered even when the camera is circling. In addition, when zoom is engaged, the size of all masked areas adjusts in proportion to the zoom position. This feature is essential for dome cameras used in wide-area monitoring applications.

Users can easily set masking areas on the screen by simply positioning each area to be masked in the center of viewer, indicated by two intersecting lines, and executing the masking function. A maximum of 24 masking areas can be preset to any of 160 horizontal and 120 vertical masking blocks, and up to eight block positions with two colors can be selected together.

Electronic-Flip (E-Flip)

See Fig. 2

The FCB-EX cameras have an E-Flip function that electrically flips an image upside down so that it is displayed on the monitor accurately. In a dome application for example, if a tracked object moves beneath the camera dome, the image can be inverted to maintain the correct orientation.

Masking Controls

Maximum number of preset masking blocks	24 blocks
Maximum number of masking blocks to be displayed	8 blocks

SMART Lens Control (Sony Modular Automatic Lens Reset Technology)

These FCB cameras incorporate a SMART Lens Control technology that monitors lens focus position during zooming and automatically compensates for mechanical misalignment which may occur over long periods of continuous usage. With the introduction of SMART lens control, periodic lens initialization is no longer recommended in continuous 24 hour operation.

Alarm Function

The FCB-EX Series provides an Alarm function that detects changes in AF, AE, or both AF and AE levels of an image and outputs an alarm signal as required to external equipment via its control interface using VISCA protocol. This feature is ideal for automatically performing functions such as sounding an audible alarm or triggering an electric door strike to lock or unlock a door when focus or luminance levels change.

These cameras are also equipped with a Spot AE function that allows them to detect changes in AE levels of designated areas of the images, and output an alarm signal. Users can designate multiple detecting areas from any of 16 vertical and 16 horizontal blocks.

In addition, these cameras feature a DAY/NIGHT mode that can output an alarm signal via the VISCA protocol in response to a change in the designated brightness/darkness level.

When auto slow shutter is on

Auto IR Cut Filter Removal (ICR)

(FCB-EX980S/EX980SP, FCB-EX980/EX980P, FCB-EX480C/EX480CP only)

For optimized sensitivity in both day and night-time shooting applications, these cameras incorporate an Auto ICR function. With a set level of darkness, the IR Cut filter is automatically disabled (ICR ON) and the infrared sensitivity is increased. With a set level of brightness, the filter is automatically enabled (ICR OFF). The ICR automatically engages depending on the ambient light, allowing the cameras to be effective in a variety of lighting conditions.

Picture Freeze

The FCB-EX Series is equipped with a Picture Freeze function that allows for the output of a still image while the camera is panning, tilting, zooming, focusing, initializing the lens, or performing preset operations. For example, the camera will output a still image before it begins to pan, tilt, or zoom, and once the operation is completed, the camera continues to display images; unnecessary images are not displayed.

EXview HAD™ CCD

(FCB-EX980/EX980P, FCB-EX480C/EX480CP, FCB-EX48C/EX48CP only)

Equipped with Sony EXview HAD CCD technology, these particular FCB cameras provide excellent sensitivity and low smear levels.

Image Stabilizer

(FCB-EX980S/EX980SP only)

The image stabilizer function minimizes the appearance of shaky images caused by low-frequency vibration and maintains a normal horizontal resolution. This function is useful for outdoor surveillance and traffic monitoring applications.

Environmentally-friendly Lead-free Design

FCB-EX Series cameras use lead-free solder and halogen-free printed-circuit boards, making these cameras environmentally friendly.
